environment

an introduction to Shepherd Gilmour Environment

Shepherd Gilmour Environment was established to provide clients with solutions to environmental and geotechnical problems, enabling the realisation and maximisation of property and assets, whilst affording protection from environmental liabilities.

Shepherd Gilmour Environment is a member of the Shepherd Gilmour Group of companies. The Shepherd Gilmour Group is a professional Practice of Consulting Civil and Structural Engineers, originally founded in Manchester in 1959 and operating out of six UK offices – Manchester, London, Leicester, Newcastle-Under-Lyme, Llandudno and Leeds.

Shepherd Gilmour Environment offer a significant range of Environmental Services associated with land purchase, land geotechnical appraisals, contaminated land assessment, waste management and environmental management and engineering. At Shepherd Gilmour Environment a team of geologists, geotechnical engineers, hydrogeologists, and environmental scientists work alongside the Directors of the company.

Advice is available on all aspects of contamination, geotechnology, hydrology, geology, and environmental issues. We have experience in the appraisal of contaminated land and remediation measures, landfill gas and leachate management, desk studies, due diligence audits, environmental assessments for landfill sites and waste treatment facilities.

Serving:

- Lawyers • Insurers • Investors • Developers
- Consultants • Local Authorities • Construction Sector
- Waste management industry

services summary

We also undertake duty-of-care audits, waste management and associated hydrogeological risk assessments, geotechnical site investigations and associated foundation analysis, mine workings appraisals, Environmental Impact Assessments, assessment of environmental liability audits and development of environmental management systems.

Contamination and environmental issues are paramount for many of our clients and the comprehensive services offered by Shepherd Gilmour Environment enable our clients to procure and develop sites with confidence.

Shepherd Gilmour Environment has a broad client base, and is currently involved in a wide and varied programme of work in construction and development, environmental management and engineering, land and property acquisition and asset management. We endeavour to provide our clients with customer focused, factual, cost effective advice at all stages of a project from land transaction to, where relevant, redevelopment. Our goal is to allow our clients to make informed business decisions based on the identification of potential financial and environmental risk.

Land, property & business acquisition assessment

- Desk studies and environmental assessments
- Phase 1,2 and 3 due diligence audits and investigations
